Price includes Taxes

CAVEAT: NFPA#96 REQUIREMENTS

DUCTS: Clean-out access openings are required (by property owner) in horizontal ductwork and each change in direction. Contractors' responsibility is limited to report on conditions of inaccessibility only.

ACCESS PANELS: By law, only properly listed access panels may be retrofitted into existing ductwork and fan housings. (NFPA #96 Standard 4-3 of the 1998 Edition, 7.5.2 of the 2001 Edition)

FANS: Fans are required to be tippable and be provided with sufficient flexible electrical conduit for fan to be removed safely. Contractor will use due care but will not be responsible for consequences resulting from insufficient or faulty wiring or electrical components, worn bearings, fan belts or other unforeseen conditions.

WASTE WATER: Contractor takes no responsibility for the composition of the grease removed from the exhaust system.

ACCESSIBLE AREAS CLEANED ONLY Areas not cleaned will be noted on the After Service Follow-Up Report.

The *After Service Follow-up Report* is not to be considered an inspection or validation of the Code compliance of the exhaust system.

All work to be completed in a workmanlike manner according to standard practices. There may be charges for extra work requested that is not written on this form. "24 hour notice of cancellation prior to scheduled service is required or a service charge will be assessed." This tender to be a binding contract if accepted for performance within thirty days hereof, with payment to be made to the contractor on completion of service and presentation of invoice to customer.

This contract is for a _____ year period with servicing to be performed every _____ months.

E. & O.E. WILL BE ENTERED These systems may require cleaning more often due to circumstances beyond our control.
